

GENETIC COUNSELING SPECIALTIES

GENERAL ADULT

For individuals 18 years or older with a known diagnosis of genetic disease or in need of an evaluation for genetic diagnosis for an adult-onset disorder.

INDUSTRY

Genetic counselors can have roles outside of seeing patients. They can work in research, education, industry, marketing, and other roles across the healthcare and genetics fields. Many genetic testing labs employ genetic counselors to analyze data and communicate results to patients and ordering providers

CARDIOLOGY

Genetic counseling can help determine if genetic testing could be beneficial and provide guidance on test results for people with a personal or family history of cardiovascular conditions.

OPHTHAMOLOGY

Genetic counseling for eye diseases can help interpret genetic mutations and clarify the risk of individuals inheriting certain vision diseases. They can also help confirm a vision-related diagnosis, provide information about treatment options, and guide families in making informed decisions.
